

MEMPHIS POOL WINTERIZING SERVICES

Making Winter Care Easy for You!

Our professional Service Department provides the following winterizing services so you have little maintenance in the winter and a smooth start-up in the spring.

PROFESSIONAL POOL CLOSING SERVICE

The right way. The easy way.

We professionally winterize your equipment and piping with a NO FREEZE GUARANTEE, plus we

- Test for and add chemicals
- Remove ladder, rails, and auto cleaner
- Place & secure cover over pool
- Install skimmer guard

NOW INCLUDED AT NO CHARGE

- Salt Cell Cleaning
- from \$169.95, chemicals extra

WINTER MESH CARE COVER PROGRAM

Start up fresh and new!

If you have a mesh cover, you have maintenance throughout the winter. We can visit your pool every 4-6 weeks to add the necessary chemicals to reduce algae growth. We'll also vacuum in March to ensure a well-prepared April pool opening.

from \$284.95, plus chemicals

Ask about our spring mesh care, available if you choose to open after April 1st.

POOL COVER MAINTENANCE

We'll take care of the leaves!

We'll gladly remove leaves and debris from your pool cover throughout the season.

\$75/hour

HEATER TUNE-UP

Save energy. Save money.

A dirty heater works harder to heat your pool, which wastes energy and money. Debris accumulates in the burner tray, and orifices and pilots get clogged. This combo makes for poor performance when you need it most.

from \$113.95 plus parts

SERVICES THAT MAKE LIFE EASIER

CARTRIDGE & DE FILTER CLEANING

Clean filters work better!

Dirty filters decrease filtration, promote algae growth, and can create cloudy water. Start up fresh and new in the spring by letting us clean your filter now.

Cartridge from \$84.95, DE \$180.95

FREE SAND WITH SAND CHANGE

Save money, improve filtration!

We recommend you change your sand every 5-7 years. Schedule this service with us in December-February, and we'll provide the sand for free.

\$204.95

REPLACE IN-LINE CHLORINATORS WITH OFF-LINE

A better, cleaner alternative.

In-line chlorinators create fumes that back up into your pump, filter, and heater, corroding key internal parts. Let us take your in-line . . . off-line. Off-line chlorinators bypass the pump and filter, protecting your equipment and your wallet from costly, preventable repairs.

REPLUMB EQUIPMENT PAD

Leaky plumbing? Difficult valves?

If you have a mess of an equipment pad with leaks and old plumbing, we can help. We can replumb it to include new valves, leak-free plumbing, and hassle-free operation.
