

MESH COVER CARE PROGRAM

Mesh covers allow a small amount of light and nutrients to pass through, which makes your pool water subject to algae growth. For this reason, our Service Department offers a Mesh Cover Care Program to

ensure your pool will be well-prepared for a successful spring opening.

Winter Mesh Care Program

October - February

To ensure clear, algae-free water, we will visit your pool every 4-6 weeks between the time the pool is closed and April 1st. During this time, we will pull back a corner of the cover to

- check the chemicals in the water, and
- add the necessary chemicals to reduce potential algae growth.

In addition, in March we will vacuum any accumulated debris ensuring your pool will be well prepared to open April 1st.

Mesh Care (Oct-Feb)

\$43.95/visit

(plus chemicals)

Mesh Care + vacuuming (Oct-Feb)

\$119.95/visit

(plus chemicals)

Spring Mesh Care Program

beginning March 1st

We strongly recommend that you open your pool by April 1st; however, if you choose to open your pool later we can be there to help. We will start up your system to begin the filtering and chlorination process, while leaving the cover on until you are ready to open your pool.

spring start-up

\$89.95 (plus chemicals)

Between the initial start-up and your scheduled opening date, we can follow up with pool care by pulling back your cover and adding chemicals every two weeks until we open your pool.

spring follow-up

\$43.95 per visit (plus chemicals)

cover removal & vacuum

\$133.95 (plus chemicals)
